Why Choose Us?

01

Introducing Qbits
which is a software and edtech company that provides project-based training and opportunity for paid Internship.

02

Qbits Learning:
Transition from project-based learning to earning a software scholarship and intern at Qbits Control.

03

Qbits Control:
A SaaS product company that simplifies tasks, boosts productivity, and modernizes operations using tech.

Product Roadmap

01 Phase 1 Qlearn
- Project Training from Day 0
- Project Completion Certificate
- Internship Completion Certificate

02 Phase 2 Qscholar
- Get Qbits Goodies
- Work with agile team
- Earn rupees 1000/- as stipend.

03 Phase 3 QApprenticeship
- Receive offer letter from Qbits Control
- Work as a Intern in Qbits Control
- Earn stipend ranging from 5k-15k

Learning Path Details

Phase 0: Prerequisites

Key Features

- 15 hours of Recorded classes.

- Start working on projects from day 0.

- Access to best-in-class LMS platform.

- 1-on-1 doubt clearing.

Module 1:
HTML

Module 2:
CSS

Module 3:
Frontend Development

Assignment:
Creating a frontend website from a design file.

Phase 1: QLearn (3 Months)
Key Features

- 45 hours of live Project Training

- Work on 3 projects

- 12 Assessments

- 6 Assignments

- 1year LMS Access

- Work with top industrial Expert
  (Microsoft, Deloitte, IBM, etc)

- 24*7 mentor Assistance

- Host your Projects on our Website

- Projects Completion Certificate

- Internship Completion Certificate

Month 1:

Project Title:
"Building Blocks: A Portfolio Showcase"

Project Objectives and Outcomes:
• Craft a visually striking portfolio site with HTML CSS.

• Ensure adaptability across devices and enhance user
  interaction.

• Present skills and projects effectively for maximum impact.

.

Module 1:
Introduction to Full Stack Development

Module 2:
Orientation

Module 3:
HTML & CSS Fundamentals (Bootstrap)

Module 4:
JavaScript Essentials

Assignment 1:
Creating a Bootstrap website

Assignment 2:
Creating a To-do List App

Month 2:

Project Title:
"Tailwind-React SPA: Streamlined single-page app development with responsive design."

Project Objectives and Outcomes:
- Build a responsive SPA with Tailwind CSS and ReactJS.
- Deliver an engaging user experience.
- Ensure efficient performance and loading times.
- Create dynamic interactions for enhanced usability.

Module 1:
Backend Node.js Basics

Module 2:
ReactJS Mastery

Module 3:
Tailwind CSS Crash Course

Assignment 3:
Host a website on NodeJS server

Assignment 4:
Create dynamic website using tailwind and React

Month 3:

Project Title:
Project Title: Empowering Web Applications with the MERN Stack

Project Objectives and Outcomes:

• Build a robust MERN stack application.

• Ensure scalability and efficiency.

• Ensure high performance and security.

• Enhance user engagement with dynamic features.
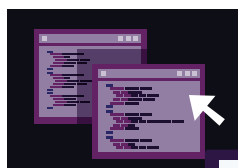

Module 1:
Database management using MongoDB.

Module 2:
Creating APIs using ExpressJS.

Assignment 5:
Setup MongoDB Database

Assignment 6:
Create a Mern Stack Project
